## Mediasphere: Australia's e-Learning Leader in Cloud-Based Educational Applications

Mediasphere is a leading web platform developer and digital content publisher that builds online SaaS applications for the government, corporate and education sectors. Awarded as the most innovative ICT company in 2009, Mediasphere has developed a suite of unique web applications (Powerhouse) for the Australian e-Learning market. The Powerhouse applications (CMS, LMS, LCMS, Intranet & Affiliate) deliver agile content management, e-learning delivery, integrated e-commerce, communication and collaboration in secure hosted portals.

The *Powerhouse CMS/LMS* platform is licensed by Australian governments and large corporate clients to deliver online induction and compliance training. [www.mediasphere.com.au](http://www.mediasphere.com.au)

### Powerhouse Campus – Your School Virtual Learning Environment

***Powerhouse Campus*** is a breakthrough cloud based application that builds e-learning communities for Australian schools, school groups, dioceses and clusters. The software creates comprehensive school intranets with database integration, learning tools, content repository, learning management system, communication hubs and a widget set to integrate a school's current e-learning applications into a central dashboard.

The ***Powerhouse Campus*** features 14 dashboards for teachers, students, parents, principals and all members of the school. The intuitive software automates time consuming tasks and publishes curriculum, assessment, class files, homework in a collaborative online environment.

#### Leveraging a School's e-Learning Investment

Many schools have invested in e-learning and school database applications. The Powerhouse Campus Class Pages feature widgets that consolidate all existing initiatives into the Powerhouse Dashboards. The widgets and tools link:

- Student Administration Systems (*student, teacher and class data*)
- Existing LMS systems (*Moodle, BlackBoard, SharePoint etc*)
- School library software
- Curriculum content repositories
- Video, animation and audio banks
- Blogs, forums, wikis
- e-Portfolios, YouTube, TeacherTube, Flickr, Google integration

In addition, schools can build year level profiles with a set of pre-existing widgets and teachers and administrators can build their own custom widgets to link to all other web-based application or files.

## **Powerhouse Campus – Cloud-based School Communities**

Powerhouse Campus is an innovative, cloud based, SaaS application that builds e-communities for schools. Your school data is still secure on your school servers and the application is delivered on the Internet.

The e-Community platform features inbuilt intelligence with smart dashboards for all school members. The dashboards provide custom tools, widgets and streamed information for:

Teachers | Students | Parents | Principals | School Boards | Co-Curricular Staff | Ancillary Staff | Subject Coordinators | School Board Secretaries | Coaches | Year Level Coordinators | Administration Managers | Administration Staff | IT Management Staff

## **Automation of Tasks and Cascading Information Sharing**

Powerhouse Campus is simple to use and automates many time consuming tasks for teachers including attendance, sharing classroom documents, scheduling homework, receiving student work and communicating with parents.

Powerhouse Campus presents schools with flexibility, management and scalability and provides these benefits:

- A powerhouse API to integrate real-time with a school's student administration system
- A customised school intranet with a SCORM compliant content repository
- Cascading and filtered calendars (shared with Outlook and Google)
- Online homework submission/download with automatic corrected work upload
- Layered announcements, broadcasts, daily notices, newsletters and reports
- Direct integration with Softlink Library Systems into dashboards
- A scalable and intuitive Learning Management System with e-books and e-courses
- Class communication with blogs, forums and wikis
- Class pages to publish curriculum and external resources for all teachers
- The ability to search and tag curriculum content from teacher Class Pages
- Activity pages (sport, debating etc) for all co-curricular staff
- Document upload, search and sharing
- Parent portals for child centric data, calendars and tools
- Inbuilt widgets to link all school applications and databases into the dashboards
- Inbuilt integration to link school directories 24/7 for teachers and students
- iPad, iPhone, android access tools with smart device detection

## **Powerhouse Connect: Management and Collaboration For School Networks and Districts**

Powerhouse Campus creates a virtualised intranet community for a single school that can easily connect with other Powerhouse Campus schools on a secure extranet. The connection is authenticated by activating the Powerhouse Connect for a school district which delivers:

- Online Professional Development between schools
- Online class collaboration projects
- Curriculum content sharing with federated searches of multiple databases
- Integrated communication – videocasts, audiocasts, blogs, wikis, forums
- Peer teaching and distance learning
- Security and Management
